ABS edge banding
Acrylic edge banding

- **2013 News**
PVC Film
- **2018 News**
Hot melt glue
- **2019**
Formed four major
manufacturing bases

DETAILED INTRODUCTION

Founded in 2002, Shanghai Angmi New Material Co., Ltd specializes in the R&D and production of PVC edge banding, PVC film, PVC plinth, PVC screw cover caps, and hot melt glue. Till now, we have sold to more than 60 countries all over the world, such as Canada, Australia, Russia, Spain, the UAE, etc., and received very good market feedback!

We started by producing high-quality PVC edge banding, adopted advanced technology and equipment from abroad, and now have two production bases for PVC-related products. We always pursue high-quality products, the best customer service, and win-win cooperation.

PVC EDGE BANDING

COMPANY ENVIRONMENT

02 PVC Edge Banding

INTRODUCTION

A PVC Edge banding is a flexible, durable, and decorative trim . A PVC Edge banding can be used for various purposes, including furniture. Whether you are looking for decorative edge banding for furniture or simple edge banding for a component, PVC is an excellent choice.

[1] Solid Color

[2] Woodgrain

[3] High Glossyt

This plastic has been successfully used in the furniture and decoration industry. It is the first choice for Europe, America and Asia market.

SOLID COLOR ^[1]

Solid-color PVC edge banding is manufactured using high-quality materials and a scientific formula. Produced with cutting-edge machinery, this series offers a wide range of colors and can be customized to meet specific customer requirements.

For more details, please feel free to consult

WOOD GRAIN [2]

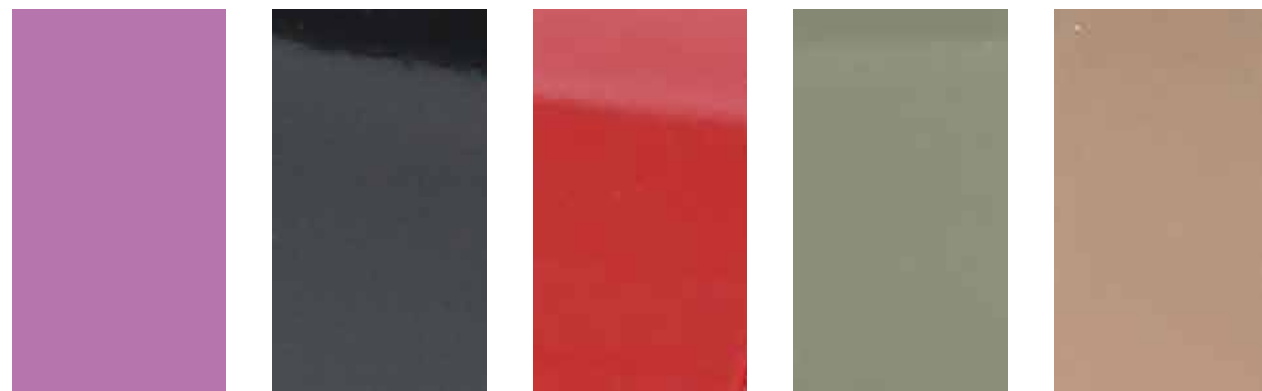

For more details, please feel free to consult

Anti-scratch PVC edge banding is crafted from high-quality materials and a scientific formula. Utilizing state-of-the-art machinery, this series features avant-garde and popular patterns and embossments. Characterized by its rich and clear texture, vivid wood effect, high wear resistance, and ease of cleaning, it is coated with primer to ensure a perfect bond between the edge banding and the board. The edge banding remains stable, without whitening or fracturing after trimming.

HIGH GLOSSY^[3]

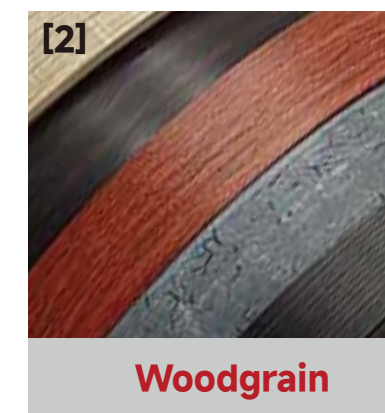

High glossy UV coated edge banding is made with best quality UV materials imported from Germany, achieving good finish smoothness, scratch resistance and appearance, which is up to the highest international standards with perfect cost efficiency.

03 ABS Edge Banding

INTRODUCTION

ABS edge banding, a high-quality thermoplastic, is renowned for its ecological sustainability, impact resistance, and mechanical and thermal resilience. This material has been successfully integrated into the furniture and decoration industries, becoming a preferred choice in markets across Europe, America, and Asia.

ABS edge banding is composed of a plastic alloy polymerized from acrylonitrile, butadiene, and styrene. It is environmentally friendly, solid, and boasts excellent resistance to both high and cryogenic temperatures. As such, it is poised to gradually replace traditional materials, emerging as the mainstream decorative material for mid- to high-end furniture.

SOLID COLOR ^[1]

We use advanced printing technology with clear texture and natural color, which can perfectly match the color and texture of various furniture boards. After trimming, the rounded corners are very smooth and shiny, with good glossiness, which not only enhances the overall beauty of the furniture, but also strengthens its durability.

WOOD GRAIN^[2]

Choose the best quality PVC raw materials production, has significant wood realistic, simple sense is good, prevent ultraviolet function strong and easy the characteristics of the adhesive.

Quality can be comparable with the similar products in foreign countries.

For more details, please feel free to consult

HIGH GLOSSY^[3]

High glossy ABS edge banding is a high-quality edge banding material mainly made of ABS resin and processed by special technology, with high gloss, wear resistance, corrosion resistance, aging resistance and other characteristics.

WORD OF MOUTH CHOICE BEST-SELLING WITHOUT HINDRANCE

The choice of thousands of customers, the dual guarantee of quality and appearance

04 Acrylic Edge Banding

INTRODUCTION

Acrylic is a high-quality material that can present the product's 3D transparent, smooth and flowing texture, and can be customized in any color, including double color.

3D TRANSPARENT

DOUBLE COLOR

Acrylic edge banding

Smooth surface, no blistering, no stretching, 3D gloss, widely used in high-end market

ACRYLIC EDGE BANDING

Smooth surface, no blistering, no stretching,
3D gloss, widely used in high-end market

05 PVC Kitchen Plinth Series

PVC SKIRTING BOARD

wone water proofstrip, transparent protection film on the surface

Length: 3m, 3.6m, 4m, accept custom.

Height: 80mm, 100mm, 120mm, 150mm

Color: Silver (aluminum) white, black, gold, accept custom.

SKIRTING ACCESSORIES

Material:	PP
Size:	10 CM Legs: 100-120mm
	12 CM Legs: 120-140mm
	15 CM Legs: 150-170mm

Clips for adjustable legs

C2

AM-CP-03

180°CORNER

Length: 10cm, 12cm, 15cm, 3m, 4m, accept customize
Adjustable legs: 10cm, 12cm, 15cm

90°CORNER

Length: 10cm, 12cm, 15cm, 3m, 4m, accept customize
Adjustable legs: 10cm, 12cm, 15cm

DIFFERENT COLORS

06 Hot Melt Glue

GLUE GRANULE

EVA hot melt glue for edge banding

Application: to cover the exposed sides of materials such as fiberboard, particle board or MDF, plywood, core-board, and fireproofing board etc.
Banding with different materials including PVC, ABS and acrylic etc.

Temperature: 150°-180°, 180°-210°

Color: white, beige, yellow transparent, white transparent, customizable

Properties: Good wetting properties, High initial viscosity, No stinging
Good thermal stability.

PVC Film

GRAY-LAMINATED FILM

Size:

thickness: 0.12-0.35mm;

width: 1250mm, 1400mm, accept customization;

Properties: wear resistant, waterproof, fireproof, easy to clean;

Application: Doors, Cabinets, PVC panels, PVC ceilings, Pvc sheets.
